

## NEW: DURALEN LDPE shrink films

### DURALEN Green

#### Made from pure LDPE based on sugar cane

100 % produced on the basis of a renewable raw material, therefore climate-neutral  
absolutely identical processability on all common shrink wrapping machines

1A shrink quality, biaxial is our speciality (50 % longitudinal, 50 % transverse)

High transparency and stability

Best optical properties, hardly distinguishable from Original DURALEN film on crude oil base

Optimum sealing properties

We are able to offer a completely authentic DURALEN LDPE shrink film in the proven quality from 100 % sugar cane for more than 50 years

In the production and the processing of the original and DURALEN Green foils, no harmful vapours or waste water are produced.

DURALEN Green films are physiologically flawless; they contain no plasticizers, heavy metals or other toxicologically questionable additives

Your product packaged in DURALEN Green - sustainable alternative for the environment
