

NEW: DURALEN LDPE shrink films

## DURALEN RECY

100 % original and unmixed from recycled DURALEN LDPE

1A shrink quality, biaxial is our speciality (50 % longitudinal, 50 % transverse)

high transparency and stability

best optical properties, hardly distinguishable from original DURALEN foil or comparable PO or PP films

optimum sealing properties with strong seal seam

we are able to offer a completely authentic DURALEN LDPE shrink film with quality from 100 % recycled DURALEN LDPE for more than 50 years

environmentally friendly, as based on production rejects and not consumed finished materials from our own production

extension of the life cycle of used and already processed film

neither in the manufacture nor in the processing of the original as well as recycled

DURALEN films do not produce harmful vapours or waste water.

DURALEN RECY films are physiologically perfect; they contain no plasticizers, heavy metals or other toxicologically questionable additive.

Your product packed in DURALEN RECY - so that you are always a step ahead: for the environment and compared to other recycled films
